Phase Adaptive Dimming Module Install Guide

ENGLISH – Please read before installing.

WARNING

Shock Hazard. May result in serious injury or death.
Turn off power at circuit breaker before installing the unit.

Buttons and LEDs in the unit are used for programming and troubleshooting. If wiring is exposed when accessing buttons and LEDs, the unit must be accessed by a certified electrician, following local codes.

Note: For additional information on unit operation and ratings, please refer to Lutron® P/N 369583 (pour QSNE-4A-D) or 369609 (pour QSNE-4A-D) at www.lutron.com.

Mounting

- Mount in IP20 (minimum) panel with integrated DIN rail.
- Internal relays make audible noise; mount where acceptable.
- Unit is 12 DIN modules (216 mm) wide.
- Mount to DIN rail using clips on bottom of unit. Clips can be pulled out using a screwdriver.

ESPAÑOL – Lea antes de instalar

PRECAUCIÓN

Descargas eléctricas. Puede causar lesiones graves o la muerte. Desconecte la alimentación con el magnetotípico antes de instalar la unidad.

Los botones y LEDs del frente de la unidad se utilizan para la programación y solución de averías. Si el cableado está expuesto cuando se accede a los botones y LEDs, el acceso lo realizará un electricista cualificado, siguiendo los códigos locales.

Nota: Para información adicional sobre el funcionamiento y las capacidades, consulte Lutron® P/N 369583 (para QSNE-4A-D) o 369609 (para QSNE-4A-D) en www.lutron.com.

Montaje

- Realice el montaje en un cuadro IP20 (mínimo) con riel DIN integrado.
- Los relés internos producen ruidos; realice el montaje donde no cause molestias.
- La unidad tiene la anchura de 12 módulos DIN (216 mm).
- Realice el montaje en el riel DIN utilizando clips de la parte inferior de la unidad. Los clips pueden soltarse con un destornillador.

Module de gradation à adaptation de phase Guide d'installation

FRANÇAIS – À lire avant de procéder à l'installation.

Avertissement

Risque de choc. Peut entraîner de graves blessures ou la mort. Couper l'alimentation au niveau du disjoncteur avant d'installer l'appareil.

Les boutons et les LED de l'appareil sont utilisés pour la programmation et le diagnostic. Si le câblage est exposé lorsque vous accédez aux boutons et aux LED, l'accès doit être effectué par un électricien qualifié, conformément aux normes locales.

Remarque : pour davantage d'informations sur le fonctionnement et les caractéristiques de l'appareil, veuillez consulter la réf. Lutron® 369583 (pour QSNE-4A-D) ou 369609 (pour QSNE-4A-D) sur www.lutron.com.

Montage

- Monter dans une armoire IP20 (minimum) avec rail DIN intégré.
- Les relais internes produisent un bruit audible, aussi il faut les monter dans un lieu où ce bruit est acceptable.
- La largeur de l'appareil est de 12 modules DIN (216 mm).
- Monter sur rail DIN à l'aide des attaches au bas de l'appareil. Les attaches peuvent être sorties à l'aide d'un tournevis.

Módulo de regulación de tensão de fase adaptável Guia de instalação

PORTUGUÊS – Ler atentamente antes de instalar.

AVISO

Risco de choque elétrico. Pode provocar lesões graves ou morte. Desligar a alimentação no disjuntor antes de instalar a unidade.

Os botões e LED existentes na unidade são utilizados para operações de programação e solução de problemas. Se a cablagem estiver exposta quando aceder aos botões e LED, o acesso à unidade deverá ser feito apenas por um electricista certificado, de acordo com as normas locais.

Nota: Para obter mais informações sobre o funcionamento e potências nominais da unidade, consultar o documento da Lutron com REF 369583 (para QSNE-4A-D) ou 369609 (para QNSE-4A-D) em www.lutron.com.

Montagem

- Montar em painel IP20 (mínimo) com calha DIN integrada.
- Os relés internos produzem um ruído perceptível; montar em local aceitável.
- A unidade possui 12 módulos DIN com 216 mm de largura.
- Montar em calha DIN utilizando grampos na parte inferior da unidade. É possível retirar os grampos com uma chave de fendas.
