## 30-Output Configurable Smart Enclosure

The Sivoia QS Smart Enclosure simplifies wiring and organizes installations with multiple Sivoia QS window treatments and other system devices and interfaces.

The Sivoia QS Smart Enclosure is designed to be hardwired into a standard 120-240 V ~ circuit. Each panel contains three sub-plates, each providing termination points for 120-240 V~ and NEC Class 2/PELV wiring. Each sub-plate is plug-in ready for two 5 -output power modules (sold separately). When fully populated with six power modules, each panel contains thirty NEC® Class 2/PELV outputs that provide power and communication to connected devices.

## Features

- Plug-in ready for up to six 5 -output power supply modules, model WIN-PS-5CC-R (sold separately)
- Thirty NEC® Class 2/PELV outputs (when populated with six 5 -output power supply modules, model WIN-PS-5CC-R), capable of operating Lutron Sivoia QS shades, drapery drive units, keypads \& accessories
- No replaceable fuses required for overload / miswire protection
- Simple wiring topology to connect QS communication between shades and other system components
- Built in Smart diagnostics verify system communication and reduce installation time
- Easy system testing with manual override buttons for shades and lighting

## Wiring Rules

## Link Terminals:

- All wiring is NEC® Class 2/PELV. Follow all applicable local and national codes for proper circuit separation and protection.
- COM: 12-18 AWG (4.0-1.0 mm²)
- MUX and $\overline{M U X}: 22$ AWG ( $0.5 \mathrm{~mm}^{2}$ ) twisted/shielded pair
