## Introducing a wireless lighting control system that saves energy and improves occupant comfort

- **Manage your building simply** — Simple interface allows quick access to building performance
- **Save energy** — Integrated building systems allow ability to monitor and adjust systems for optimal performance
- **Minimize downtime** — Wireless solutions install 70% faster providing quick retrofit between tenant changes
- **Expand over time** — Start with current tenant fit out and add to the system as spaces change
- **Simple integration** — Using BACnet native to the hub, connect with your other building systems
