

Rania Natural White Tape Light

PRODUCT DESCRIPTION

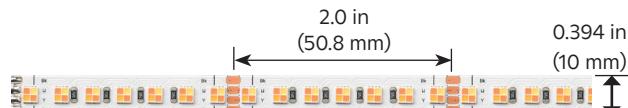

A complete Rania natural white tape light solution consists of field-cuttable LED tape, a wireless controller with integrated LED drivers, high-reliability punch connectors, dedicated wiring, and a power interface. For an added level of quality, install the tape light inside Lutron LED tape extrusions.

High-output tape lights are offered in 16.4 ft (5 m) and 98.4 ft (30 m) spools and long run tape lights are offered in 32.8 ft (10 m) and 98.4 ft (30 m) spools to complete any lighting design project.

FEATURES

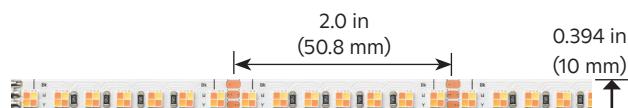

Natural Light—Rania leverages a breakthrough three-channel solution and state of the art color mixing technology to deliver a wide CCT range and replicates natural light more faithfully than any light source other than Ketra.

Natural Show—The Rania fixtures' wide color temperature range and native control enables it to participate in Lutron's Natural Show. Natural show automatically adjusts the intensity and color temperature of the light over the course of the day. It can be used to bring the outside in by matching outdoor light - from the cool bright light at noon to the warm lower light in the evening.

HIGH OUTPUT	
Delivered Lumens	350 lm/ft
Delivered Output (Light Transmission)	76 lm/W
Power Consumption	4.6 W/ft (15.3 W/m)
Maximum Tape Length per Power Interface	16.4 ft (5 m)

Note: High Output runs greater than 11 ft (3.3 m) should use dual ended wiring.

LONG RUN	
Delivered Lumens	200 lm/ft
Delivered Output (Light Transmission)	76 lm/W
Power Consumption	2.6 W/ft (8.6 W/m)
Maximum Tape Length per Power Interface	32.8 ft (10 m)

Note: Long Run that are greater than 16.4 ft (5 m) should use dual ended wiring or be split into parallel runs.

LED TAPE EXTRUSIONS

SR1

Luxury diffusion with hidden mounting

SR2

Classic rectangular surface-mount

SR3

Thin, low profile surface-mount

45S

Classic 45° angled surface-mount

45T

Large 45° with premium diffusion

RR1

Recessed mount with a clean finish

MI1

Mount into drywall for a flush light beam

All profiles available in 8 ft (2.44 m) lengths. See page 9 for the [Extrusion Ordering Guide](#).

LED TAPE LIGHT SPECIFICATIONS ¹
Optical Performance

CCT Range	1800 K - 5500 K
CRI (Ra)	>90 (R9>90) from 2700 K to 5000 K
Lumen Maintenance ²	50,000 hours to L70 @ 25 °C
Dimming Range	0.1-100%

Mechanical

Mounting Options	Tapes can also be mounted using Lutron extrusions. Refer to LED Tape Extrusions Spec (P/N 3691292) for the list of all extrusions supplied by Lutron
Backing	Strong VHB Adhesive

Environmental

Ambient Temperature	32 °F to 104 °F (0 °C to 40 °C)
Extended Ambient Temperature	-32 °F to 32 °F (-35 °C to 0 °C) ³
Humidity	0% to 95% non-condensing
Certification	UL, cUL, RoHS, FCC Class B, Title 24 [JA8]
Location	UL Indoor damp/dry location Wardrobe closet rated
Outdoor/Indoor	Outdoor use available for residential enclosed/covered patio applications
Limited Warranty	www.lutron.com/warranty or call 1.844.LUTRON1 for a printed copy. The warranty will not cover issues caused by use of incompatible devices (including non-Lutron LED tape and/or power supplies).

Dimensions

Tape Length	High-Output: 16.4 ft (5 m) and 98.4 ft (30 m) versions Long Run: 32.8 ft (10 m) and 98.4 ft (30 m)
Cuttable Section	2.2 in (55.8 mm)
Tape Width	0.39 in (10 mm)
Tape Height	0.05 in (1.2 mm)

Electrical

Voltage	24 V==
Power Consumption	High-Output: 4.6 W/ft (15.3 W/m) Long Run: 2.6 W/ft (8.6 W/m)
Maximum Tape Length per Power Interface	High-Output: 16.4 ft (5 m) Long Run: 32.8 ft (10 m)

Notes:

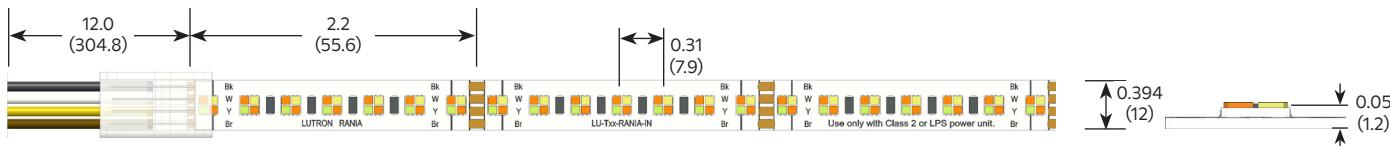

¹ All measurements are considered typical performance and were taken at 3000 K, 25 °C ambient, 100% power input, no optical accessory unless otherwise stated.

² Lumen maintenance values calculated in accordance to TM-21 procedures based on LM-80 compliant measurement data.

³ Color accuracy not guaranteed in extended ambient temperature range in outdoor applications.

LED TAPE LIGHT DIMENSIONS

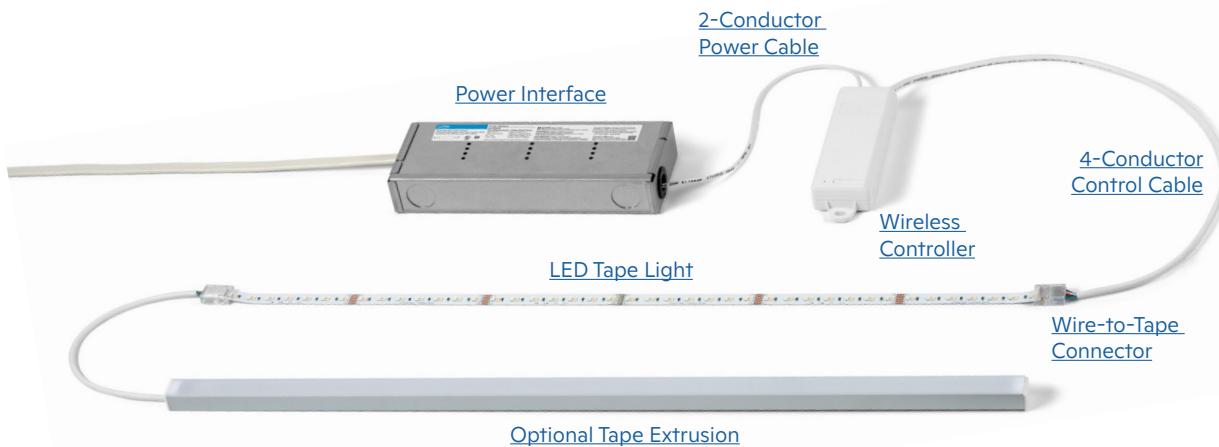

All dimensions shown as: in (mm)

CAUTION: Overheating Risk. May result in moderate injury or product damage. Do not power the LED tape while coiled, on a spool, or directly to 120 V~ power. Unroll or install before applying power.

COMPONENT SPECIFICATIONS

MULTI-CHANNEL WIRELESS CONTROLLERS
(HWL-MWCL-WH, RRL-MWCL-WH, CM-MWCL-WH)

Regulatory Approvals

Certification **cULus listed for USA & Canada, FCC Part 15 Class B compliant, ICES-005 compliant**

Electrical

Input	24 V== 1.5 A
Output	24 V== 96 W max
Electrical Protection	Output short-circuit and overload protection
Wiring	Wireless RF/Clear Connect - Type X (CCX)
Emergency Lighting	Evaluated by UL® for emergency lighting systems in accordance with standard UL® 924 and CSA C22.2 No. 141 when paired with LVS™ model LUT-SHUNT-A-TD (UL® file E206507)

Environmental

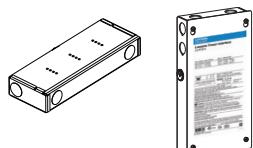

Ambient Temperature	32 °F to 104 °F (0 °C to 40 °C)
Humidity	0% to 95% non-condensing
Location	Indoor use only
Air Handling Spaces	UL® 2043 Plenum Rated

Communication

Radio Frequency for Wireless Communication	2.4 GHz Wireless RF, Lutron Clear Connect - Type X (CCX)
Range	<ul style="list-style-type: none">- All CCX devices must be within 75 ft. (22.9 m) of their assigned processor or gateway- Each CCX device must have at least two (2) other non-battery powered CCX devices within 25 ft (7.5 m)- Groups or clusters of CCX devices assigned to the same processor or gateway must not be separated by more than 25 ft (7.5 m)- It is recommended that the wireless processor or gateway and the CCX devices assigned to it are located on the same floor- CCX devices must be placed a minimum of 3 ft (1.0 m) from 2.4 GHz interference sources such as wireless access points, microwave ovens, Vive hubs- Radio Power Savr occupancy/vacancy sensors (LRFx) must be mounted at least 2 ft (0.6 m) away from CCX devices

Warranty

Limited Warranty	www.lutron.com/warranty or call 1.844.LUTRON1 for a printed copy. The warranty will not cover issues caused by use of incompatible devices (including non-Lutron LED tape and/or power supplies).

- Powers up to three wireless controllers and a total of 96 W of tape
- Class 2 separation
 - LU-PH3-A: Barrier provided for installation in the wiring compartment
 - LU-PH3-B: Barrier pre-installed
- LU-PH3-B: 96 W power interface with flying lead connections. Best for surface mounting
- LU-PH3-A: 96 W power interface with terminal connections. Best for recess mounting.

WIRING

POWER INTERFACES (LU-PH3-A; LU-PH3-B)

- Power up to three wireless controllers and 96 W of LED tape.
- LU-PH3-A: Terminals on the power interface accept 12 AWG to 20 AWG (4.0 mm² to 0.75 mm²).
 - Each screw terminal may only accept one wire.
 - LU-PH3-A is grounded by a terminal connection.
- LU-PH3-B: Use provided wire connectors to connect flying leads to wire per instructions printed on the connector bag.
- LU-PH3-B is grounded by a grounding screw.

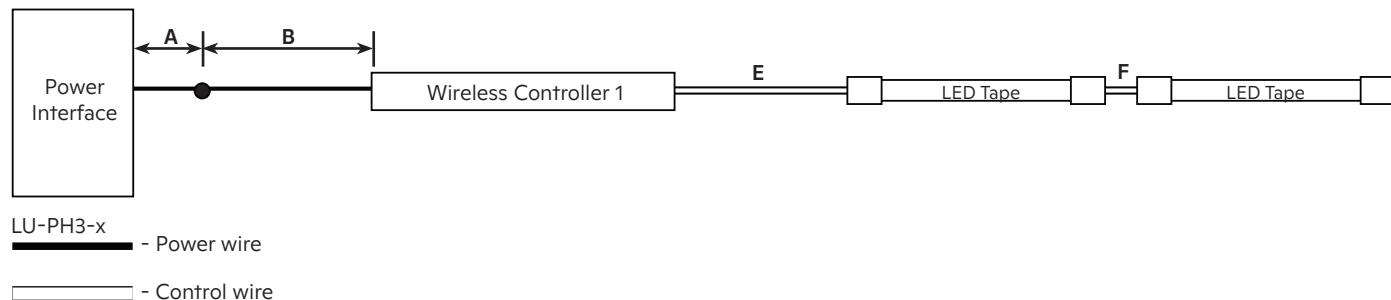

WIRE LENGTH RECOMMENDATIONS

The wiring diagrams and wiring tables on the next pages demonstrate how power wire and control wire lengths can be varied to increase installation flexibility and maintain optimum performance. Refer to the diagram below for control wire and power wire. If using more than six connectors on any individual series-wired LED tape run, each additional connector reduces the maximum length of the control wire allowed by 6 in (152.4 mm), regardless of gauge.

WIRING DIAGRAM 1: Rania Tape Light Installation

For a single wireless controller:

- Power Cable = A + B Control Cable = E + F

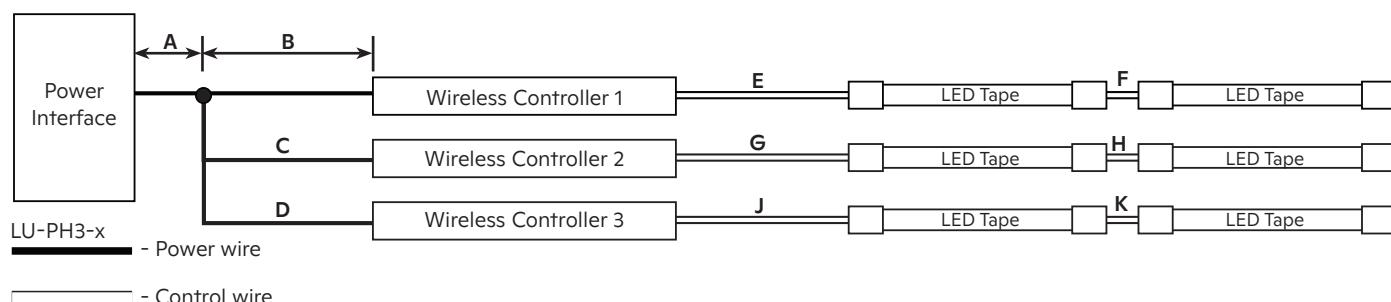

WIRING DIAGRAM 2: Rania Tape Light Installation with Multiple Controllers

For a multiple wireless controllers:

Each wireless controller cable lengths should be calculated by each controller using the below table.

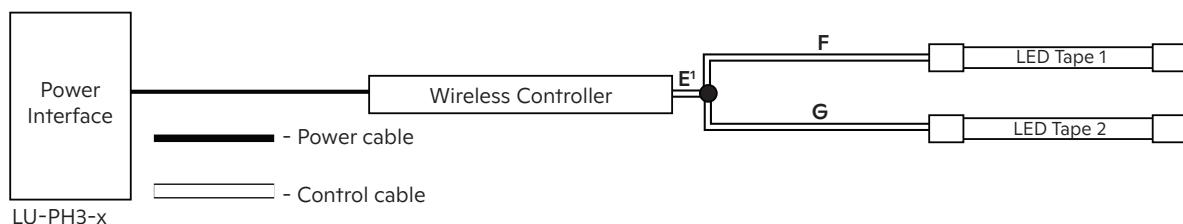

- Wireless Controller 1: Power Cable = A + B Control Cable = E + F
- Wireless Controller 2: Power Cable = A + C Control Cable = G + H
- Wireless Controller 3: Power Cable = A + D Control Cable = J + K

WIRING (cont.)
WIRING DIAGRAM 3: Rania Tape Installation - Split into Parallel Runs, Each No More Than 16.4 ft (5 m)

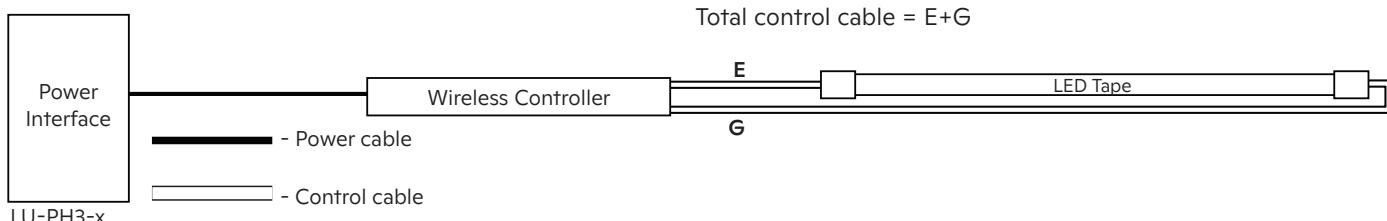

Total control cable length for each tape includes the following:

- Control Cable 1 = E + F
- Control Cable 2 = E + G
- Total Control Cable = (E + F) + (E+G)

Note:

¹ It is recommended to keep cable length (E) as short as possible, less than 1 ft (0.3 m) is ideal, to maintain optimum performance.

WIRING DIAGRAM 4: Rania Tape Installation with Connection to Both Ends of the Tape (Dual-ended); Total LED Tape Must be Less Than 32.8 ft (10 m)

WIRING (cont.)
TABLE 1: Rania High Output Installation Cable Lengths for Power and Control Cable

The below table values apply to a Rania high output tape with one (1) power interface and one (1) multi-channel wireless controller (Wiring diagrams 1, 3, and 4) or one (1) power interface and up to three (3) multi-channel wireless controllers (wiring diagram 2). If parallel power wiring exists, the table values assume that the power cable connections are in the homerun configuration to the power interface (spliced closest to the power interface) and the tape lengths are similar. The displayed values allow for up to 25% lumen drop at the beginning of the LED tape.

Tape Length ft (m)	Power Cable ¹		Total Control Cable Length ft (m) ²				
	Wire Gauge AWG (mm ²)	Total Cable Length ft (m)	12 AWG (4.0 mm ²)	14 AWG (2.5 mm ²)	16 AWG (1.5 mm ²)	18 AWG (1.0 mm ²)	22 AWG (0.5 mm ²)
0-4 (0-1.2)	20 (0.75)	15 (4.6)	417 (127.1)	262 (80.0)	165 (50.3)	103 (31.4)	41 (12.5)
	16 (1.5)	40 (12.2)					
	14 (2.5)	64 (19.5)					
	12 (4.0)	102 (31.1)					
4.1-8 (1.2-2.4)	20 (0.75)	7 (2.1)	209 (63.7)	131 (40.0)	82 (25.0)	52 (15.8)	20 (6.1)
	16 (1.5)	20 (6.1)					
	14 (2.5)	32 (9.8)					
	12 (4.0)	51 (15.5)					
8.1-11 (2.5-3.4)	20 (0.75)	10 (3.0)	287 (87.5)	180 (54.9)	113 (34.4)	71 (21.6)	28 (8.5)
	16 (1.5)	28 (8.5)					
	14 (2.5)	44 (13.4)					
	12 (4.0)	70 (21.3)					
11.1-16.4 (3.4-5.0) ³	20 (0.75)	7 (2.1)	385 (117.3) ³	242 (73.8) ³	152 (46.3) ³	95 (29.0) ³	37 (11.3) ³
	16 (1.5)	18 (5.5)					
	14 (2.5)	29 (8.8)					
	12 (4.0)	47 (14.3)					

Notes:

¹ Refer to Wiring Diagram 1 for what the total power wire length indicates.

² Refer to Wiring Diagram 1 for what the total control wire length indicates.

³ This row assumes the tape has the control wire connected on both ends of the tape as in Wiring Diagram 3. For tape lengths over 11 ft (3.4 m) it is recommended to connect the control wire on both ends of the tape run as in Wiring Diagram 3.

WIRING (cont.)
TABLE 2: Power Wire and Control Wire Lengths for Long Run Rania Tape Lights

All Rania long run tape light installations >16.4 ft (5 m) should use one of the two wiring methods:

- Split into parallel runs, each no more than 16.4 ft (5 m), see Wiring Diagram 2.
- Wireless controller connection should be made to both ends of the tape, see Wiring Diagram 3.

The below table values apply to long run Rania tape with one (1) power interface and one (1) multi-channel wireless controller (Wiring diagrams 1, 3, and 4) or one (1) power interface and up to three (3) multi-channel wireless controllers (wiring diagram 2). If parallel power wiring exists, the table values assume that the power cable connections are in the homerun configuration to the power interface (spliced closest to the power interface) and the tape lengths are similar. The displayed values allow for up to 25% lumen drop at the beginning of the LED tape.

Tape Length ft (m)	Power Cable ¹		Total Control Cable Length ft (m) ²				
	Wire Gauge AWG (mm ²)	Total Cable Length ft (m)	12 AWG (4.0 mm ²)	14 AWG (2.5 mm ²)	16 AWG (1.5 mm ²)	18 AWG (1.0 mm ²)	22 AWG (0.5 mm ²)
0 - 8.0 (0 - 2.4)	20 (0.75)	14 (4.3)	393 (119.8)	247 (75.3)	155 (47.2)	97 (29.6)	38 (11.6)
