Welcome home

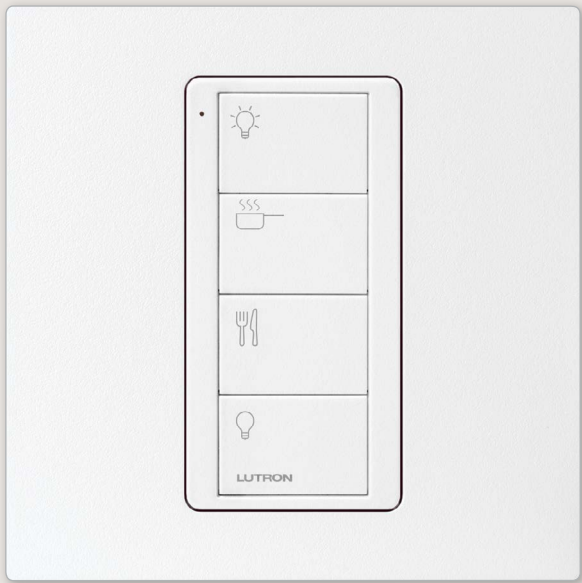

Schedule exterior lights to turn on before you arrive home at the end of your day.

Then turn on entry lights with the Home button to illuminate a path from your front door.

Heading out? The Away button ensures that you will never leave the lights on.

Transform a room

Easily set multiple lights and shades to just the right levels for cooking, a quiet dinner, or cleaning up.

		 Ceiling lights	 Island lights	 Pendant	 Shades
	Bright	100%	100%	100%	Open
	Cooking	100%	100%	50%	75% Open
	Dining	20%	65%	50%	Half Open
	Off	Off	Off	Off	Closed

Entertain and relax

From lively to serene, and everything in between, create the perfect atmosphere for any mood or occasion with lights, shades, and audio control at your fingertips. Turn lights up and start the music as guests arrive or close the shades and dim the lights to enjoy a glare-free movie with the touch of a button.

Control where you want it

Mount a Pico wireless remote to a wall without cutting a hole or wiring anything. A screwless wallplate design adds a finishing touch to a wall-mounted Pico.

Unwind or get ready

Enjoy your night or morning routine in the perfect light.

Allow your eyes to relax in the evening and gradually adjust in the morning.

Control the lights in your bathroom without opening the door, or using an inconvenient pullcord.

With a sensor, lights automatically turn off after you leave the room.

That way, you'll never have to worry about accidentally leaving them on.

Rest assured

Use the Goodnight button to turn lights off and lower blinds in other rooms of your home, from the comfort of your bed. Hear a noise in the night? Turn hallway lights on and raise living room blinds with the Alert button.

And if you're a night owl but your partner isn't, use the Pico wireless remote for individual control of the lamp on your side of the bed. (You can also use the plug-in lamp dimmer for individual control; see page 12).

Control where you want it

Mount a Pico wireless remote on a tabletop pedestal. Tabletop pedestals are available in single, double, and triple configurations.

System components

When you choose RA2 Select, you are selecting a smart home system comprised of wireless remotes, load controllers, and sensors for lighting and shade control, as well as an app.

RA2 Select was developed so you can choose the specific components you want in order to create the system that will best suit your lifestyle.

Main repeater

The main repeater lets you control your lights and shades from a smartphone or tablet using the free Lutron App. It also enables system integration with other leading brands (see page 17).

If you need to expand the wireless range of your system, you can add a wireless repeater to enjoy control throughout your home.

In-line dimmers & switches

Use in-line controls, which are ideal for new or retrofit applications, to reliably dim or switch LEDs. In-line dimmers/switches install in the ceiling and fit through a typical downlight cutout, making them an easy addition at any time.

Occupancy sensors

Radio Powr Savr occupancy sensors automatically turn lights on when you walk into a room and off when you leave. Available in ceiling-, corner-, and hallway-mount options, for the right amount of coverage in any room.

Plug-in lamp dimmer

A plug-in lamp dimmer is a simple way to add dimming to a table or floor lamp. Just plug one end into a lamp and the other into a standard socket. Available in black and white.

Pico scene keypads

Scene keypads are available engraved with common scenes, for typical activities in your home. They automatically configure for the room type and type of fixtures in the room.

Pico remote controls

Pico wireless remote controls are great for controlling lights, shades, and audio individually, from anywhere throughout your home.

You can also customise a Pico wireless remote keypad with scenes that you create to suit your lifestyle. And you can easily change scenes whenever you want.

Wallplates

Wallplates are available with one, two, or three openings.

Colours and finishes

*Wallplate only

System components

Automated shades

Automated shades are great for any room in your home, including areas with hard to reach windows. They provide privacy when you need it and keep the sun out or let it in, so your cooling system doesn't have to work as hard.

Lutron automated shades move quietly, in unison, and are available in three styles with an extensive selection of fabrics.

Shades are controlled with a Pico wireless remote, or integrated into a whole home control system.

Roller shades: (wired)

Roller shades complement both traditional and contemporary designs and are available in different sizes to accommodate the needs of any room.

Roller shades (battery operated)

This battery-powered solution features industry-leading battery life and is easy to install and maintain, making it perfect for retrofit applications. (It's also offered with wired power.)

Drapery systems

Choose from elegant pinch pleat or ripplefold styles, as well as drapery that moves up from bottom to top.

Smart home made simple

RA2 Select makes it easy to turn your home into a smart home. Build its foundation around these key features:

Scheduling — you can program lights and shades to automatically adjust at set times of day.

Geofencing — controls lights based on your location.

This feature can turn lights on for you when you arrive home and notify you if you've left lights on when you leave.

Smart Away — randomly turns lights on and off in the evening, so it looks like you're home, even when you're not.

Easy and Expandable — start with just a couple of rooms to experience the benefits of a smart home and expand when you're ready. Expanding your smart home system is easy with the free Lutron App for Apple® and Android™.

RA2 Select also works with smart home solutions from other best-in-class brands. Expand your system to add even more convenience to your day-to-day life:	
	Amazon Alexa Create just the right light using Alexa voice control. Ask Alexa to turn lights on, off, or dim them to your favourite level.
	Apple® HomeKit™ The Smart Bridge contains Apple HomeKit technology, so you can use Siri® to control your lights and shades.
	The Google Assistant™ Get the lights with just your voice. Smart lighting control is now available through any Google Assistant-enabled device.
	Honeywell Wi-Fi Thermostats Choose from a wide variety of thermostat options to control the temperature in your home, from anywhere. Compatible with Honeywell Wi-Fi thermostats, including Lyric Round and T Series.
	IFTTT (If This Then That) Create IFTTT recipes: a sequence of conditions that when triggered (If This) cause your RA2 Select system to turn on the lights or open the blinds (Then That).
	Ring Peace of mind is knocking. Set lights to turn on when your Ring doorbell or camera detects motion outside.
	Sonos Control your Sonos Home Sound System from a Pico remote control for audio or from scenes in the Lutron App. You can also control your lights using your voice via the Sonos One with Amazon Alexa.

Technology you can count on

Clear Connect RF Technology

Lutron's patented Clear Connect RF technology sets the bar for reliability. You can trust that your wireless system will work with precision and accuracy, free from interference with other frequency bands, every time you use it.

LED Centre of Excellence

- LED Centre of Excellence — 1000s of bulbs, drivers, and fixtures tested for compatibility
- LED report cards provide performance results, including trim settings, maximum number of lamps, and perceived low end
