

PALLADIOM BESPOKE METALS

Advanced **Palladiom** technology combined with premium Focus-SB custom finishes. Together, they deliver an exceptional solution for traditional design spaces.

PALLADIOM BESPOKE METALS

Inspired by old world craft and instilled with modern technology, Palladiom controls harness the power of light to curate the perfect scene with a single button press.

Now, you can marry these controls with a classically designed, solid brass, unfinished metal faceplate.

Heavy and crisp, with perfect edges and corners.

Pair that beautifully crafted faceplate with a finish from Focus-SB, for a distinctive, tailor made solution for your most discerning customers.

Choose from 20 standard as well as hundreds of custom finishes. Easily coordinate with or complement other hardware, fixtures, or accents in a home, ensuring design continuity.

And do it all without sacrificing the Lutron quality and intelligence you'll find in a Palladiom keypad.

Hallmarks of that quality and intelligence include **backlit engraving and dynamic backlighting**. Backlit engraving, which can be customised, provides a visual guide in a dark room. Dynamic backlighting brightens to indicate an active scene and automatically adjusts to ambient light levels in the space.

PALLADIOM BESPOKE METAL FINISHES

HomeWorks QS Wired Palladiom Bespoke Keypad—How to Build Model Numbers
Purchased from Lutron

Step 1: Keypad Bases Unit—Bespoke
(Buttons + bulk keypad)

* Customer must provide engraving details at time of order.
