RESIDENTIAL APPLICATIONS

Add versatility to the most important room in the house

KEY ROOM CONSIDERATIONS

- Bright light for cooking
- Dim light for evening
- Sleek-looking controls to match appliances

RECOMMENDED SOLUTIONS

GOOD

Maestro dimmer

Go from homework to meal prep to dining with a different light level suited to each activity.

- MACL-153M-XX

BETTER

Sunnata dimmer

Easily set the lights by touching or swiping the light bar on this dimmer, which features next gen design and technology.

PRO Tip! Pair a black dimmer with a stainless steel wallplate to match kitchen appliances.

- STCL-153M-XX

BEST

Original smart dimmer for Caséta*

Quickly change scenes using the Lutron App, voice control, or a Pico scene keypad. Conveniently turn on overhead and under cabinet lights for cooking, dim all lights to set the mood for dining, or brighten over-the-sink lights for clean-up.

PRO Tip! Use a Pico remote in the dining room to lower kitchen lights once the meal is on the table.

- PD-6WCL-XX for overhead lighting
- PD-5NE-XX for low-voltage lighting

* Smart hub required for voice and app control

Go touchless for lights and fans

KEY ROOM CONSIDERATIONS

- An exhaust fan that turns off automatically
- Hands-free lighting

RECOMMENDED SOLUTIONS

GOOD

Maestro timer

Set the timer to automatically turn off the exhaust fan — avoid energy waste and motor burn out.

- MA-T51MN-XX

BETTER

Maestro sensor switch and timer

Use the sensor switch to turn the lights on and the timer to control the exhaust fan.

PRO Tip! Make the Maestro sensor a dimmer sensor and set a favorite level so lights automatically turn on to a soft level for middle-of-the-night trips.

- MS-OPS2-XX
- MA-T51MN-XX
- MSCL-OP153M-XX

BEST

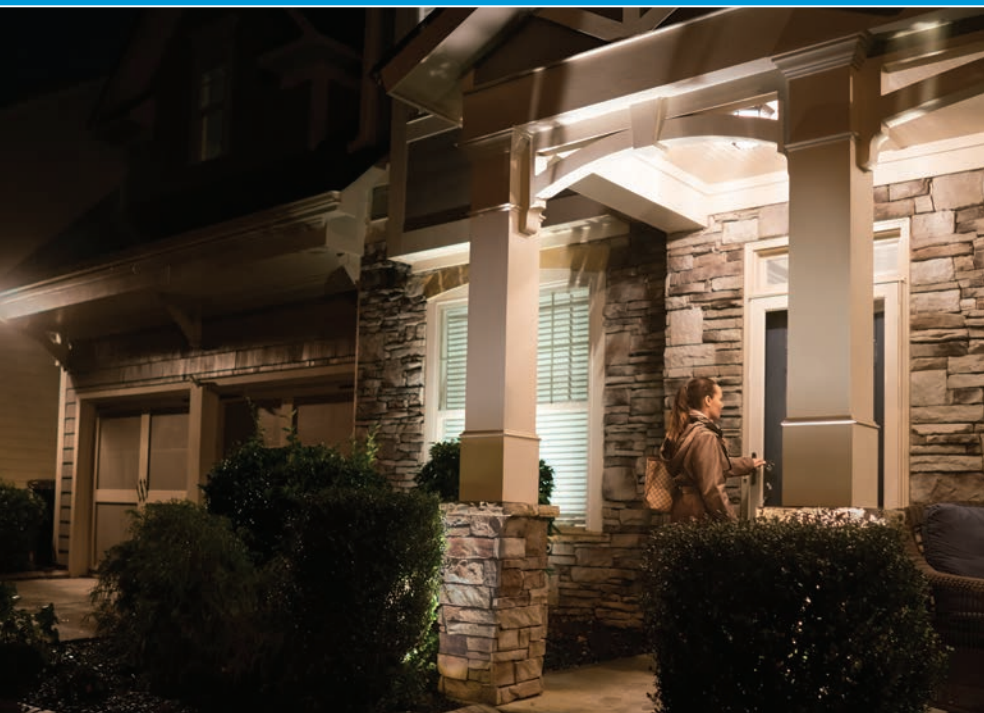

Original smart switch and smart dimmer with wireless sensor for Caséta

Control the fan with the switch and the lights with the dimmer. Easily place the wireless sensor where it provides the best coverage.

- PD-6ANS-XX
- PD-6WCL-XX
- PD-OSENS-WH

Come home to peace of mind

KEY ROOM CONSIDERATIONS

- Easy to find control when entering the house at night
- Lights that automatically turn on at dusk, so you don't come home to a dark house

RECOMMENDED SOLUTIONS

GOOD

Diva dimmer

With the Diva paddle dimmer with small slider, easily find the “on” switch when you walk into a dark house. Adjust the light to a low level when expecting guests.

- DVCL-153P-XX

BETTER

Sunnata dimmer

The soft glow from the light-bar feature on Sunnata makes the dimmer easy to find when walking into a dark house.

- STCL-153M-XX

BEST

Original smart switch and smart dimmer with smart hub for Caséta*

Create a schedule using the Lutron App, with lights turning on at dusk and off at a designated time (so they aren't on all night). No rescheduling needed when the seasons change; the lights will automatically adjust.

- P-BDG-PKG1WS
- P-BDG-PKG1W

* Smart hub required for voice and app control

Create the perfect atmosphere
for entertaining or relaxing

KEY ROOM CONSIDERATIONS

- Hassle-free fan control
- Easily change from relaxing lighting to task lighting
- Scene control without getting off the couch

RECOMMENDED SOLUTIONS

GOOD

Diva fan control and light switch

Turn lights on/off with the large paddle switch, change fan speed with the small slider.

- DVFSQ-LF-XX

BETTER

Maestro fan control and light dimmer

Add the sleek design of a Maestro fan control and LED+ dimmer to individually adjust both from a single control.

- MACL-LFQ-XX

BEST

Original smart dimmer and plug-in lamp dimmer for Caséta

Quickly adjust overhead lights and floor lamps together using voice control or a Pico scene keypad.

PRO Tip! Add a Caséta smart fan speed control; turn the fan on/off and adjust fan speed right from the Lutron App. Perfect for when relaxing — you won't have to leave your comfortable chair.

- PD-6WCL-XX
- PD-3PCL-WH
- PD-FSQN-XX

* Smart hub required for voice and app control

Enjoy control from the
comfort of your bed

KEY ROOM CONSIDERATIONS

- Delayed off, so you can find your way across the room
- Adjusting lights from the bed
- Controlling floor lamps from the room entryway

RECOMMENDED SOLUTIONS

GOOD

Maestro

Maestro has a delayed fade-to-off feature; overhead lights lower softly before turning off so you can cross the room to your bed before the room goes dark. Also available in fan/light.

- MACL-153M-XX

BETTER

Diva smart dimmer and plug-in lamp dimmer for Caséta

Use a bedside Pico to control floor lamps with the plug-in lamp dimmer, overhead lights with the wall dimmer, or both!

- DVRF-6L-XX
- PJ2-3BRL-XX-L01R
- PD-3PCL-WH

BEST

Diva smart dimmer with smart hub for Caséta*

Use the Lutron App or a Pico remote to ensure all house lights are off, right from your bed.

- DVRF-BDG-1D

* Smart hub required for voice and app control

Soften lights for an intimate dinner with family or friends

KEY ROOM CONSIDERATIONS

- Bright light for setting the table and cleaning up
- Dim light for dinnertime, entertaining, or a midnight snack
- Adjusting the mood quickly and easily

RECOMMENDED SOLUTIONS

GOOD

Dalia dimmer

The SoftGlow locator light will help you easily find the dimmer in the dark. Adjust the light to a low level when sitting down to eat or entertaining friends and family.

- RCL-153PNL-XX

BETTER

Sunnata dimmer

Sunnata dimmer features next-gen design and technology — impress guests by touching or swiping the light bar.

- STCL-153M-XX

BEST

Diva smart dimmer for Caséta*

Activate a “Dinner” scene with voice control—just say the word!

PRO Tip! Use the Pico remote to add an additional point of control anywhere, without cutting holes or running wire. Use the middle “Favorite” button to set and recall a favorite light level.

- DVRF-6L-XX
- PJ2-3BRL-XX-L01R

* Smart hub required for voice and app control

Live, learn, and work in the right light

KEY ROOM CONSIDERATIONS

- Lower the background lights for video calls
- Raise the lights for homework or arts and crafts
- Easily adjust the lighting for the right activity

RECOMMENDED SOLUTIONS

GOOD

Diva fan control and light switch

Fan/light combination allows ability to individually switch the LED lights and control fan speed without using pull chains — perfect for any task.

- DVFSQ-LF-XX

BETTER

Maestro fan control and light dimmer

Use a dual fan/light control to dim LED bulbs and adjust fan speed. Easily adjust the light to a preset level with a single tap. Double tap for full brightness.

- MACL-LFQ-XX

BEST

Original smart dimmer and plug-in lamp dimmer for Caséta

Use a Pico control to adjust all of the lighting in the room without leaving your desk.

PRO Tip! Add a fan control to adjust the fan speed without having to get up in the middle of an important meeting.

- PD-6WCL-XX
- PD-3PCL-WH
- PJ2-3BRL-XX-L01R
- PD-FSQN-XX

Let Lutron get the lights
when your hands are full

KEY ROOM CONSIDERATIONS

- Lights turn on upon entering without you having to reach for a switch
- Lights turn off automatically after a set time of inactivity

RECOMMENDED SOLUTIONS

GOOD

Maestro sensor switch

A Maestro motion sensor automatically turns lights on when you enter and off when you leave a room—hands-free.

- MS-OPS2-XX

BETTER

Maestro dimmer sensor

Don't want the lights to turn on to full bright every time? Set the sensor to turn on to a preset level and have it turn the lights off automatically when you leave.

- MSCL-OP153M-XX

BEST

Original smart dimmer with wireless sensor for Caséta

Place a Caséta dimmer on the wall and the wireless sensor anywhere in the room to provide the best coverage.

- PD-6WCL-XX
- PD-OSENS-WH

Control lights without waking little ones

KEY ROOM CONSIDERATIONS

- Easily dim or turn lights off when a baby or toddler falls asleep
- Automatically turns lights off

RECOMMENDED SOLUTIONS

GOOD

Credenza lamp dimmer

Don't get up—Dim the lights right from your chair while you rock your baby to sleep.

- TTCL-100-XX

BETTER

Maestro sensor

Use a motion sensor to avoid lights accidentally being left on all day. Use the dimming sensor to adjust for pre-bedtime light levels.

PRO Tip! Set the sensor to vacancy mode so lights don't turn on when your little one turns while sleeping.

- MS-OPS2-XX
- MSCL-OP153M-XX

BEST

Diva smart dimmer and plug-in lamp dimmer for Caséta

Conveniently control the lights from anywhere with a Pico remote—like a rocking chair, or the doorway. You can also use the Lutron App to remotely check if lights were left on.

- DVRF-6L-XX
- PJ2-3BRL-XX-L01R
- PD-3PCL-WH

* Smart hub required for voice and app control

PROBLEM SOLVERS

Full hands make it hard to get the lights

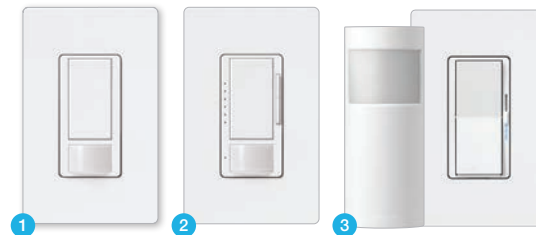

Carrying stuff in or out of a storage room?
Taking out the garbage?
Loading up the car?
Every homeowner could use an extra set of hands.

SOLUTION

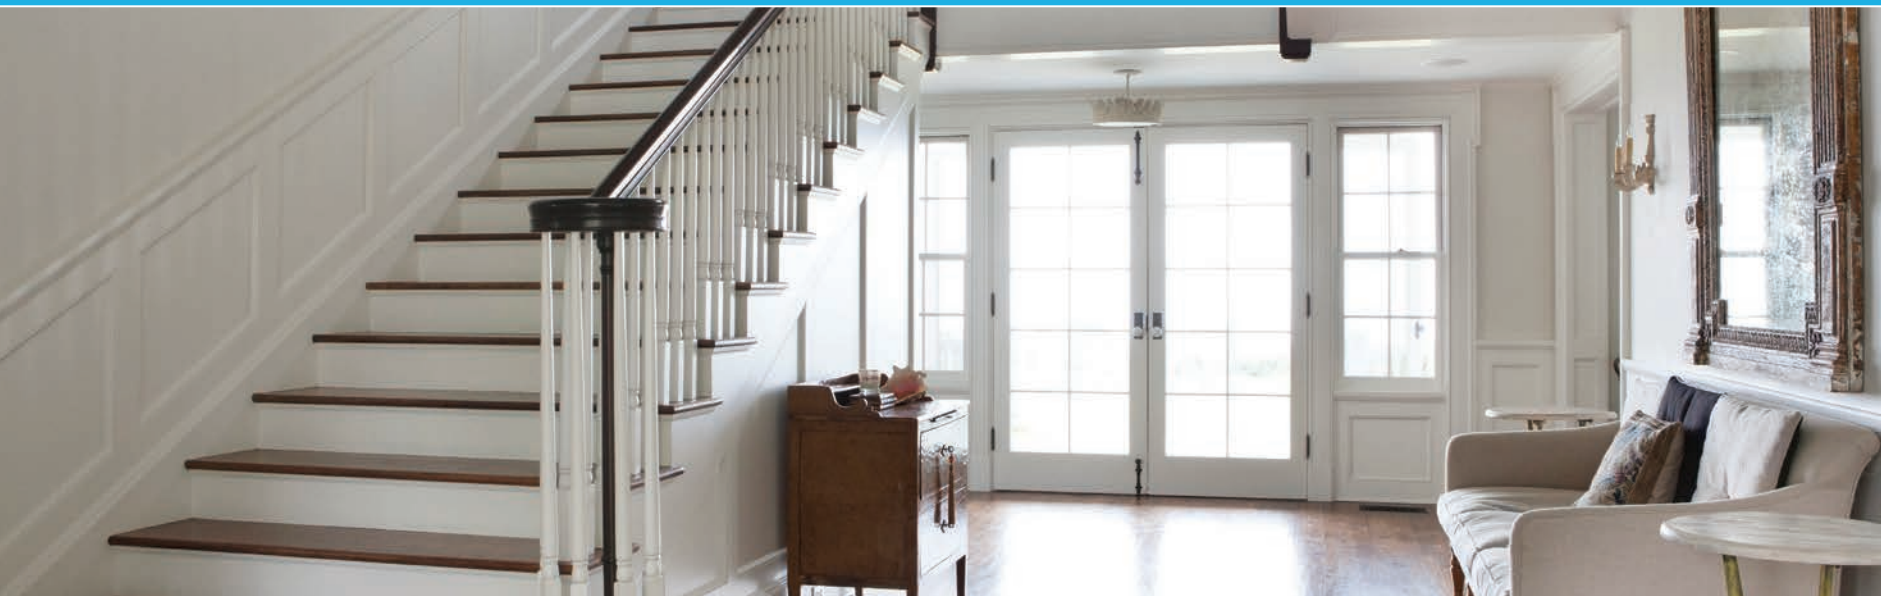

A motion sensor.

With a sensor, a homeowner doesn't have to manage full hands with trying to reach a light switch — or make an extra trip back to the switch to turn the lights off.

RECOMMENDED OPTIONS:

- 1 Maestro occupancy/vacancy sensor switch
- 2 Maestro occupancy/vacancy dimmer sensor
- 3 Diva smart dimmer with wireless sensor for Caséta
(wireless sensor compatible with Caséta controls only)

You need to provide dimming control from two locations

- Does your customer want to adjust the light from either side of a dining room?
- Are there switches at either end of a hallway or stairs, but no way to dim the lights?

SOLUTION

Multi-location control.

Give them full control with multi-location dimming.

RECOMMENDED OPTIONS:

- 1 Maestro digital-fade dimmer and companion dimmer
- 2 Sunnata PRO dimmer and companion dimmer
- 3 Original smart dimmer and Pico remote control for Caséta*

* Ideal for turning a single-pole switch into a 3-way without running any wires!

You need to add a 3-way control without pulling wire

Have a customer who's tired of walking through a dark room to find the light switch on the opposite wall?

SOLUTION

Add a wireless 3-way with a Pico remote. No backbox required, and no need to cut holes or run wire. Simply install the Pico on a wall, replace the existing switch with a dimmer, and you're set.

RECOMMENDED OPTIONS:

Diva smart dimmer and Pico remote control for Caséta

You need to provide dimming for table or floor lamps

Your customer is tired of walking around a room in the dark to turn on multiple lamps (and then do the same exercise to turn them off). Likewise, they're tired of turning off overhead lights, only to see the lamp across the room is still on.

SOLUTION

Dimming for table or floor lamps

Eliminate their frustration with a lamp dimmer; simply plug it in — and give them remote control. Keep the Pico remote on the table or mount it on the wall at the entryway.

RECOMMENDED OPTIONS:

Plug-in lamp dimmer and Pico remote control for Caséta

Finding the right LED can be difficult

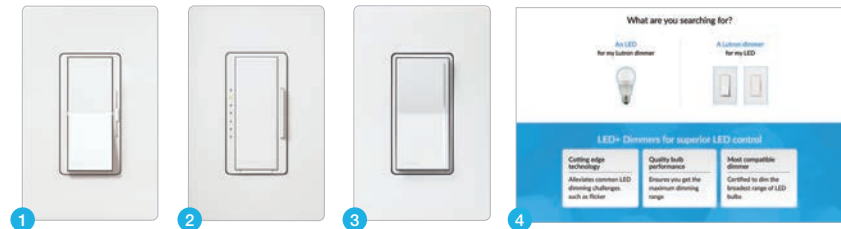

- Does your customer need LEDs that have strong dimming performance?
- Have you been called back to a job for flickering or buzzing LEDs?
- Does your customer already have LEDs and needs a dimmer that has been tested to work

SOLUTION

Dimming for table or floor lamps

Resolve frustrations with LED lighting before they happen. Find the right pairing of LEDs and Lutron dimmers to fit your customer's application.

RECOMMENDED OPTIONS:

- 1 LED+ dimmers — low-end trim to easily customize the dimming range to the bulb
- 2 Maestro PRO dimmer — forward and reverse phase, optional neutral connection available but not required
- 3 Sunnata PRO dimmer — forward and reverse phase, neutral connection required
- 4 LED Compatibility Tool lutron.com/ledfinder
Updated frequently with the most recent bulbs

COMMERCIAL APPLICATIONS

Commercial Applications

Quickly adjust when needs change

KEY ROOM CONSIDERATIONS

- Save energy when the office isn't occupied
- Adaptable lighting zones: multiple or single
- Personalized control for individual fixtures/zones
- Flexibility for space reconfiguration

State appropriate codes: [lutron.com/energycodes](https://www.lutron.com/energycodes)

Quick estimate and a code-compliant BOMs: questd.lutron.com

Vive full suite product information: [lutron.com/vivesavestime](https://www.lutron.com/vivesavestime)

RECOMMENDED SOLUTIONS

GOOD

Vive standalone solution

Start with a wireless Pico remote and PowPak for simple zone dimming without complex wiring.

- RMJS-8T-DV-B
- PJ2-3BRL-GXX-L01

BETTER

Vive standalone paired with a Radio Powr Savr sensor

Wireless sensors are an easy addition to any space for occupancy/vacancy sensing — reduce lighting energy use when a space is unoccupied. Add additional sensors and pair to existing controls to increase coverage.

PRO Tip! Add a Pico remote on a pedestal for personalized control.

- PJ2-3BRL-GXX-L01
- RMJS-8T-DV-B
- LRF2-OCR2B-P-WH

BEST

Vive centralized system

A Vive hub communicates with existing controls on the floor for simple set-up and scheduling

PRO Tip! Add Vive Vue to allow facilities team to remotely monitor and report on energy use and space utilization.

[lutron.com/vivesavestime](https://www.lutron.com/vivesavestime)

Adapt for multiple uses

KEY ROOM CONSIDERATIONS

- Various points of control (from a professor's desk or points of entry)
- Dimming/multiple zones of light and scenes needed for presentations
- Save energy when the room/building isn't in use

State appropriate codes: lutron.com/energycodes

Quick estimate and a code-compliant BOMs: questd.lutron.com

Vive full suite product information: lutron.com/vivesavestime

RECOMMENDED SOLUTIONS

GOOD

Maestro in-wall dimmer sensor

Lights turn on when the room is occupied and off when it's not; you can also adjust the lighting levels for presentations.

- MSCL-OP153M-XX

BETTER

Vive standalone

With the simplicity of wireless, PowPaks paired with sensors and Pico wireless remotes allow you to create scenes for any use case. Easily change scenes with push-button programming if needs change.

- PJ2-4B-GXX-L31
- RMJS-PNE-DV
- LRF2-OCR2B-P-WH

BEST

Vive centralized system

A Vive wireless hub communicates with wall controls on the floor and enables and supports AV integration through open API for smart classrooms.

PRO Tip! Add a Pico remote on a pedestal for control from a desk or podium.

lutron.com/vivesavestime

Retrofit small spaces

KEY ROOM CONSIDERATIONS

- Dimming to increase energy savings
- Multiple points of control
- Remote scheduling/auto off

State appropriate codes: [lutron.com/energycodes](https://www.lutron.com/energycodes)

Quick estimate and a code-compliant BOMs: questd.lutron.com

Vive full suite product information: [lutron.com/vivesavestime](https://www.lutron.com/vivesavestime)

RECOMMENDED SOLUTIONS

GOOD

Maestro in-wall dimmer sensor

Dimming and motion sensing in one device provides a quick touchless solution.

- MS-Z101-XX

BETTER

Vive Maestro dimmer + sensor

A Vive Maestro wireless dimmer paired with a Radio Powr Savr sensor turns lights on and off based on occupancy, and extends coverage for larger areas.

PRO Tip! Add a Pico wireless remote to any surface for 3-way control without new wiring

- MRF2S-8SD010-XX
- LRF2-OCR2B-P-WH
- PJ2-3BRL-GXX-L01

BEST

Vive centralized system

As additional spaces are retrofitted in the building, add a Vive wireless hub which communicates with controls throughout the space. The Vive hub supports scheduling to provide preprogrammed changes in light levels based on time of day, and enables load shedding, which automatically reduces light loads during peak electricity usage times.

DISCOVER THE POWER OF SMART LIGHTING

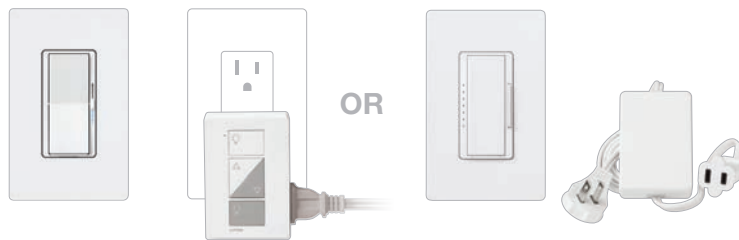

It's easy to give your customers smart lighting control with Lutron. With Caséta & RA2 Select, homeowners can control their lights with an app, a remote, their voice, or the switch.

Create a wireless system in 5 simple steps

1 Pick your system

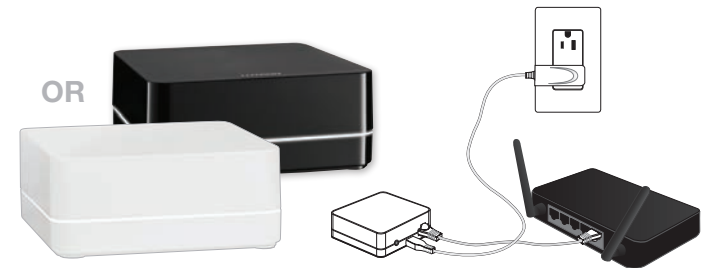

2 Install your devices

You can add more dimmers whenever you want.

3 Plug in the smart hub or main repeater

Connect the ethernet cable to the router and the power cord to the smart hub or main repeater.

4 Acquire the homeowner's Wi-Fi credentials

5 Use Professional Mode on the Lutron App to set up the system

Professional Mode provides step-by-step setup instructions

Transform existing buildings with wireless lighting controls

Flexible, wireless controls and sensors for simple, code-compliant design

Simple-to-use software

Vive software

Communication protocols

Communicate via RF to control components

Communicate via WiFi to smart devices

Communicate via wired Ethernet to Vive hub

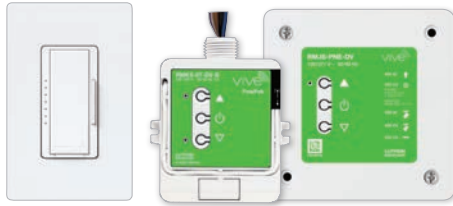

DESIGN FLEXIBILITY FOR YOUR SPACE —

The appropriate control solution is defined by the needs of the space and its occupants. Use the following steps to plan and design an ideal, energy-saving solution.

Create a wireless system in 5 simple steps

1 Choose dimming and/or switching controls

Switching, Phase dimming, 0-10V or DALI

2 Add sensors to your job

Wireless occupancy/vacancy sensors, daylight sensors.

3 Choose a Radio Powr Savr daylight sensor

Ceiling-mount

4 Choose Pico wireless remotes for personal control

Switching, dimming or scene control

Mount a Pico on a wall (without cutting holes/running wire) or place it on a tabletop

5 Add centralized control and reporting

Vive wireless hub with Vive app

Vive app allows you to view energy usage information in real time to drive decision making, provides load shed and timeclock scheduling along with proactive alerts to show any issues, helping improve building maintenance efficiency
