Control Functionality

Occupant Enters:

Lights do not automatically turn on when an occupant enters the space; lights must be turned on manually.

When Occupied:

Manual: Occupant uses wall switches to turn on and turn off general, white-board lighting, and perimeter daylight zone.

Occupant Exits:

All lights automatically turn off 15 minutes after all occupants exit.

Add a Vive wireless hub to enable simple setup and re-zoning, system monitoring, timeclock functionality, and advanced integration.

Code Notes: For non-daylight classrooms, all general lighting can be connected to a single switching module.
