Lighting Functionality

Occupant Enters:

Lights do not automatically turn on when an occupant enters the space; lights must be turned on manually.

When Occupied:

Manual: Occupant uses wall switch to turn all lights off.

Occupant Exits:

All lights automatically shut off 15 minutes (by default) after all occupants exit.

Add a Vive wireless hub to enable simple setup and rezoning, system monitoring, timeclock functionality, and advanced integration.

Visible System Components

Pico wireless switch

Radio Powr Savr
wireless corner-mount
occupancy sensor

Type of Solution

Dimming: Increased control, ambiance, and energy savings.
