Touchless technology for adaptive spaces

Even as times change, design remains essential to shaping our world. The future requires flexibility, hands-free control, and state-of-the-art experiences.

Leverage the power of Lutron technology to deliver touchless, seamless integration you can implement tomorrow at any budget. With Lutron's complete portfolio of lighting controls, shading solutions, and app-based software, we're your trusted lighting partner at every step.

6 easy-to-implement strategies

Touchless controls
Our sensors and software operate lights and shades automatically.

Flexibility through digital lighting
Create and redefine zones and scenes of light digitally without calling a contractor

Dedicated personalised control
For controls that only YOU touch, Lutron Pico remotes put flexibility at your fingertips.

Shade fabrics for well-being
Choose from anti-microbial, PVC-free, or low-VOC shading fabrics to optimise occupant comfort without sacrificing daylight and views.

Lighting for messaging and wayfinding
Use light as a natural guide for easy navigation or to indicate room sanitisation status.

Easy retrofit solutions
Design with wireless for easy installation, even after walls are closed.
