

Touchless technology for adaptive spaces

Even as times change, design remains essential to shaping our world. The future requires flexibility, hands-free control, and state-of-the-art experiences.

Leverage the power of Lutron technology to deliver touchless, flexible, and seamless integration that you and your clients can implement tomorrow at any budget – simply.

With Lutron’s complete portfolio of lighting and shading solutions, including Vive, EcoSystem, and software for design and installation, we’re your trusted lighting partner at every step.

5 easy-to-implement strategies

Touchless controls

Our sensors and software operate lights and shades automatically.

Flexibility through digital lighting

Vive and DALI by Lutron make it easy to adapt designs and installations on the fly.

Dedicated personalised control

For controls that only YOU touch, Lutron Pico remotes put flexibility at your fingertips.

Easy retrofit solutions

Wireless controls are simple, scalable, and easy to install at any point in the project.

Remote support from Lutron

We’re there 24/7, through every project phase.

Reach out to a Lutron representative for a Touchless Tech review of your project.
