

# How to Become a RadioRA 3 Installer

## Step 1 Take the qualification training

Enroll in the 1-day, hands-on training that can be booked with [your local distributor](#). The course fee covers training materials and includes a working RadioRA 3 system.

## Step 2 Download software

Visit <https://lutron.com/downloadlatestdesigner> to download the Lutron Designer software. Access to the software will be granted as a part of completing your training.

## Step 3 Install your system

With your training, you received a RadioRA 3 system. Install the system in your home to experience its benefits firsthand. This personal familiarity will enable you to more effectively showcase and sell the system to your customers.

## Step 4 Find resources and consultation tools

After successful completion of training, you will receive links to technical information, sales tools, and assets to leverage in your business. Make sure you've [opted in](#) to receive emails from Lutron for ongoing updates and training opportunities.

## Step 5 Start selling

With your hands-on experience, software proficiency, and access to resources, you are now ready to confidently present, demonstrate, and sell RadioRA 3 solutions to your customers.

For more information on device options visit the [RadioRA 3 website](#).

If you have additional questions about becoming a RadioRA 3 installer, please reach out to your local distributor or reach out to [eacs@lutron.com](mailto:eacs@lutron.com).
