

On-site Prewire Visit (LSC-PREWIRE-ONST)

An on-site visit designed to familiarize the electrical contractor with wiring and mounting of system devices, discuss the construction schedule, and review Lutron documentation.

Visit Summary

- An on-site meeting where a Lutron field service engineer reviews the submittal package, particularly the online and the device specifications with the electrical contractor, answers questions, and review construction timeline.
- Electrical contractor will sign off on meeting once complete.

Additional Information

- Lutron requires 10 business days' notice to schedule an on-site visit.
- Coordination of required visit attendees, including lighting designer and/or electrical engineer, is the responsibility of the facility representative.
- Quantity dictates the number of sessions purchased.
- Facility representative should secure access to the required areas prior to the visit date.
- This visit may occur after hours at an additional cost.
