

Lutron ECO Addressing Service (LSC-ECO-ADDRESS)

This is a calculated service which includes the addressing time required based on the number of Lutron EcoSystem devices submitted to be addressed on your current Lutron system.

Visit Summary

- This calculated service determines the amount of time a Lutron field service representative will be needed on-site to address EcoSystem devices.
- A facility representative must be present during this visit and be prepared to provide access to all locations where the lighting control system is controlling.
- Devices must be installed, powered, and the wiring must be verified per the instructions in the EcoSystem controller's installation guide prior to the site visit.
- This visit is for addressing only, and does not include Sequence of Operations development or other programming.

Additional Information

- Lutron requires 15 business days' notice to schedule an on-site visit.
- Coordination of required visit attendees is the responsibility of the facility representative.
- Facility representative should secure access to the required areas prior to the visit date.

Contact Information

- Phone: 1.888.LUTRON1 (588.7661)
