insert engraving suggestions

ENGRAVING SUGGESTIONS

To help distinguish which text goes with which key turn direction on insert-style keyswitches, Lutron recommends separating the two function descriptions with a vertical bar (“|”), by typing **Shift + Backslash** on keyboard.

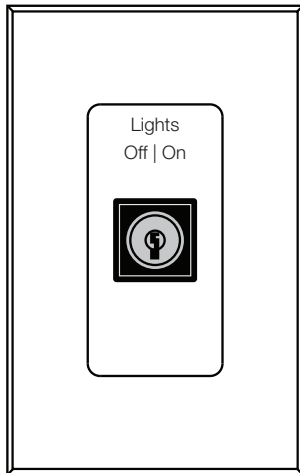

Text to the left of the bar goes with the left function, and text to the right of the bar goes with the right function.

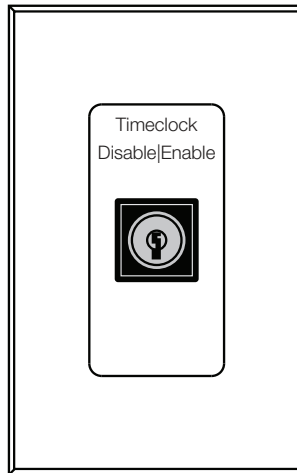

Below are some suggested examples for light control, timeclock, and afterhours mode applications.
