

LED Color - Color/Finish - Engraving Code
QSWAS-1B- - - - -
1 Button Wallstation

Description

- Offers toggle functionality for any combination of zone(s) in the system.
- Receives up to two contact closure inputs via a connector on the back of the Wallstation.
- Large, rounded buttons are easy to use.
- Backlit buttons with optional engraving make it easy to find and operate the Wallstation in low light conditions.
- Optional button engraving is angled up to the eye for easy reading.
- Available with either Green or Blue status and backlight LEDs.
- The LED in the button is used during programming and provides feedback when the button is pressed.

QSWAS-2BRL- - - - - 2 Button Wallstation with Raise/Lower

Description

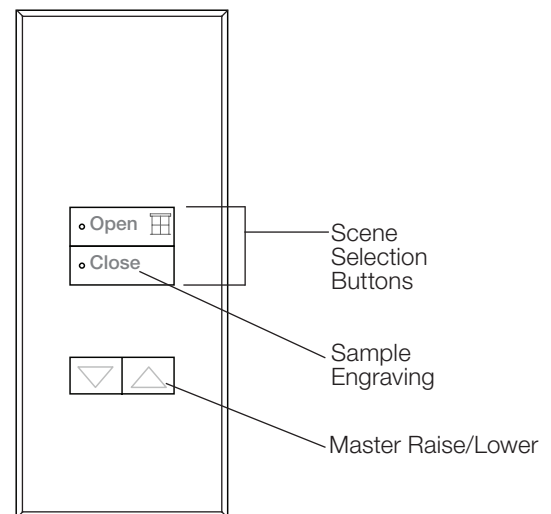

- Often used to select and adjust scenes.
- Receives up to two contact closure inputs via a connector on the back of the Wallstation.
- Large, rounded buttons are easy to use.
- Backlit buttons with optional engraving make it easy to find and operate the Wallstation in low light conditions.
- Optional button engraving is angled up to the eye for easy reading.
- Available with either Green or Blue status and backlight LEDs.
- Master raise/lower brightens or dims all lighting or raises/lowers all assigned shades/draperies in the last selected scene or toggled group.
- The LEDs in each button are used during programming and provide feedback when the buttons are pressed.
- Shades/draperies control features (E01 engraving):
 - Can control Sivoia QS shades/draperies.
 - Pressing the Open (or Close) button once will cause the shades/draperies to move to the fully open (or closed) position.

Note: Wallbox may not be required for all installations. Consult local electrical codes for Class 2 devices.

QSWAS-1RLD- - - - Dual Wallstation with 3 Button and 2 Button with Raise/Lower

Description

- Used to control one or more lighting or shades / draperies groups simultaneously.
- Functions as two independently programmable controllers: a 3 button (top keypad group) and a 2 button (bottom keypad group). Can control two lighting zones, two shades / draperies zones, or one of each.
- Receives up to two contact closure inputs via a connector on the back of the Wallstation.
- Large, rounded buttons are easy to use.
- Backlit buttons with on-button engraving make it easy to find and operate the Wallstation in low light conditions.
- Optional button engraving is angled up to the eye for easy reading.
- Available with either Green or Blue status and backlight LEDs.
- The LEDs in each button are used during programming and provide feedback when the buttons are pressed.
- Shades / draperies control features (E01 engraving):
 - Used to control multiple groups of shades / draperies independently from a single-gang keypad (e.g., a window with a sheer shade / drapery and a blackout shade / drapery).
 - Often used to select three different groups of shades / draperies using Open, Close, and Raise / Lower.
 - Can control Sivoia QS shades / draperies.
 - Pressing the Open (or Close) button once will cause the shades / draperies to move to the fully open (or closed) position. Tap any button (regardless of function) to stop a shades / draperies that is in motion.

Specifications for QSWAS Signature Series Keypads

Power Input (Control Link Terminal 2)

SELV/PELV/NEC® Class 2. Operating voltage: 24–36 V_{DC} 30 mA

Key Design Features

- Field-changeable button and faceplate assemblies allow easy customization.
- Meets IEC 801-2. Tested to withstand 15 kV electrostatic discharge without damage or memory loss.
- Faceplate snaps on with no visible means of attachment.
- Use Faceplate Replacement Kits to change color, button configuration, or engraving.

System Communications and Capacity

- SELV/PELV/NEC® Class 2 wiring connects Wallstations to other devices on the QS Link.
- A QS system can have up to 100 devices and 100 zones; Signature Series QS wallstations each count as 1 device and 0 zones on the QS Link.
- A Signature Series QS wallstation consumes 1 power draw unit (PDU) on the QS link. For complete information, see “Power Draw Units on the QS Link,” Lutron PN 369405.

Terminals

Accept up to two 18 AWG (1.0 mm²).

Environment

32 °F to 104 °F (0 °C to 40 °C). Relative humidity less than 90% non-condensing.

Compatibility

Signature Series QS keypads are compatible with GRAFIK Eye QS control units, Sivoia QS shades/draperies, Energi Savr Node units, and Quantum system devices.

Mounting

Backbox dimensions:

4.4375 in (113 mm) high, 1.5625 in (39 mm) wide, 2.8125 in (71 mm) deep.

⚠WARNING – Entrapment Hazard – May result in serious injury or death. These controls should only be used to control equipment which is visible from every control location.

⚠WARNING – Fire Hazard – May result in serious injury or death. Only use these controls to operate approved load and equipment types.

IMPORTANT NOTE: Examples of such equipment which must not be operated by these controls include (but are not limited to) motorized gates, garage doors, industrial doors, microwave ovens, heating pads, fireplaces, space heaters, etc. It is the installer's responsibility to ensure that the equipment being controlled is visible from every control location and that only suitable equipment is connected to these controls. Failure to do so could result in serious injury or death.

Back View

Available Control Types

Signature Series QS wallstations are available in three types:

Lights Only

QSWAS-3BRL-G-WH-EGN

Lights and Shades/Draperies

QSWAS-1RLD-G-WH-EGN

Shades/Draperies Only

QSWAS-5BRL-G-WH-E01

Lights Only

- Controls only lights.
- Has a programmable column type (choose from the list on the following pages).
- Engraving options: General (EGN) and Non-Standard (NST).

Lights and Shades/Draperies

- Top column controls only lights and has a programmable column type (choose from the list on the following pages).
- Bottom column controls only shades/draperies and has a programmable column type (choose from the list on the following pages).
- Engraving options: General (EGN) and Non-Standard (NST).

Shades/Draperies Only

- Controls only shades/draperies.
- Models with preset buttons have programmable preset levels.
- Engraving options: Standard (E01), Secondary (E02), and Non-Standard (NST).

Job Name:	Model Numbers:
Job Number:	

Available Column Types

Scene (with Off)

- Controls preprogrammed scenes on one or more scene controllers (such as a GRAFIK Eye QS control unit, or an area on an Energi Savr Node unit).
- Buttons within a column control the same scene controller(s) (different buttons within a column cannot control different scene controllers).
- The scene recalled by the first button in a column is programmable, subsequent buttons recall the next numerical scene, and the last button always recalls Scene Off.
- A 1 button scene Wallstation will always toggle between the assigned scene and Scene Off.

Scene (without OFF)

- Identical function to Scene with Off, except the last button in a column recalls the next consecutive scene, not Scene Off.

Zone Toggle

- Buttons toggle a zone or group of zones between programmable preset values and Off (where all zones are Off).
- Each zone can be programmed to a different value.
- Each button can be individually programmed to a different zone or group of zones.

Partition

- Allows the user to assign individual buttons of a column to different scene controllers (areas).
- A single button press on the wallstation indicates an open partition (LED ON) within the space. Devices programmed to that button communicate with each other in both directions.
- A second button press on the wallstation indicates a closed partition (LED OFF) within the space so that devices programmed to that button function independently.

2B Partition (2 button Wallstation only)

- Identical function to Partition, except that there are two buttons.
- A top button press indicates an open partition; a bottom button press indicates a closed partition.

2B Fine Tune (2 button Wallstation only)

- Buttons function as raise and lower buttons for assigned zones.
- A button tap will raise/lower the level of assigned zones by 1%.
- Press and holding the buttons smoothly raises to high end or smoothly lowers to low end.

2B Sequence (2 button Wallstation only)

- All assigned scene controllers continuously cycle through either Scenes 1-4 or Scenes 5-16 using the programmed fade times for each scene.
- Useful for spaces that desire dynamic lighting, such as decorative lighting or displays in retail stores.
- A top button press starts sequencing; a bottom button press stops sequencing.

(continued on next page)

Job Name:	Model Numbers:
Job Number:	

Available Column Types (continued)

2B Panic (2 button Wallstation only)

- Button press causes all assigned scene controllers go to Scene 16.
- Temporarily disables all button presses and ignores scene or zone level changes.
- A top button press enables Panic Mode; a bottom button press disables Panic Mode.

2B Timeclock (2 button Wallstation only)

- Allows the user to enable or disable the timeclock on a GRAFIK Eye® QS control unit.
- A top button press enables the timeclock; a bottom button press disables the timeclock.

Shades/Draperies

- Wallstation must have more than 1 button.
- Raise/Lower buttons are recommended for programming.
- The top button becomes the Open button; the bottom button becomes the Close button for associated Lutron Sivoia QS shades/draperies or third-party AC window treatments.
- For keypads with more than two buttons, the middle buttons are programmable Preset buttons.

Shades/Draperies Group

- Available only on a multi-column keypad where another column is a shades/draperies column.
- Allows the shades/draperies column to operate as multiple independent keypads (one per group).
- Group/button with LED ON indicates which shades/draperies group is currently active.

Note:

- Column types can be changed using the GRAFIK Eye QS control unit programming menu and the Energi Savr Node HHD application (e.g., control that is programmed as "Lights Only" can be changed to "Shades/Draperies Only").
- Additional programming features are available in a Quantum system application.

Wallstation Wiring

QS Link Wiring

- Use SELV/PELV/NEC® Class 2 wiring to connect Wallstations to the QS link.
- Connect two 22 AWG (0.5 mm²) shielded, twisted pair wires to terminals 3 and 4 of the wallstation's control link connector. Shielding (drain) of the twisted pair wires must be connected together as shown, but do not connect the shielding to earth/ground or the wallstation and do not allow it to contact the grounded wallbox.
- Connect the appropriate size wires to terminals 1 and 2 for power, according to your link length (see table below).
- Connect Drain/Shield as shown. Do not connect to Ground (Earth) or Wallstation. Connect the bare drain wires and cut off the outside shield.

Note: Use appropriate wire connecting devices as specified by local codes.

Link Wiring less than 500 ft (153 m)

Link Wiring 500 ft (153 m) to 2000 ft (610 m)

QS Link Wire Sizes (check compatibility in your area)

QS Link Wiring Length	Wire Gauge	Lutron Cable Part Number
Less than 500 ft (153 m)	Power (terminals 1 and 2) 1 pair 18 AWG (1.0 mm ²)	GRX-CBL-346S (non-plenum) GRX-PCBL-346S (plenum)
	Data (terminals 3 and 4) 1 twisted, shielded pair 22 AWG (0.5 mm ²)	
500 ft to 2000 ft (153 m to 610 m)	Power (terminals 1 and 2) 1 pair 12 AWG (4.0 mm ²)	GRX-CBL-46L (non-plenum) GRX-PCBL-46L (plenum)
	Data (terminals 3 and 4) 1 twisted, shielded pair 22 AWG (0.5 mm ²)

Wallstation Wiring (continued)

Contact Closure Inputs

Specifications

- Inputs must be dry contact closure, solid-state, open collector (NPN/PNP), or active-low (NPN)/active-high (PNP) output.
 - Open collector (NPN) or active-low (NPN) on-state voltage must be less than 2 V_{DC} and sink 3.0 mA
 - Open collector (PNP) or active-high (PNP) on-state voltage must be greater than 12 V_{DC} and source 3.0 mA
- Wallstation is miswire protected up to 36 V_{DC}.
- Outputs must stay in the closed or open states for at least 40 ms in order to be recognized by the Wallstation.

Contact Closure Input Wiring

- Use low-voltage SELV/PELV/NEC® Class 2 wiring to connect the contact closure inputs to the Wallstation.
