

ASHRAE's BACnet® Guestroom Software License

Features

- This license for BACnet software enables a third-party hospitality building management system to control, monitor, and manage lights, shades, devices, and HVAC systems.
- The information available through the guestroom system and this license includes, but is not limited to, the following:
 - any lights on
 - all lights off
 - shades levels
 - shades closed
 - room temperature
 - temperature setpoints
 - thermostat alarms
 - lighting and HVAC power data
 - device statuses
- This license is used to share information between guest rooms and hotel Building Management Systems.
- This license must be activated by a certified Lutron service engineer.
- BACnet IP is embedded in guestroom control unit.
- There are two types of BACnet devices:
 - Subsystem devices (main BACnet devices; typically one per guestroom).
 - Area devices (virtual BACnet devices; typically one or more per guestroom).
- Visit the system overview web portal at www.lutron.com/myroom to find the BACnet Protocol Implementation Conformance Statements (PICS) applying to main subsystem devices and virtual area devices. These documents detail all BACnet objects available in each version of software.
- BTL tested and certified.

System Requirement

- Model number: GCU-HOSP
One guestroom control unit required for each guestroom.

License Requirement

- Model number: LMR-BAC-PR
One BACnet software license required for each guestroom.

Limitations

- RF devices communicating to the Guestroom Control Unit through a wireless hybrid repeater will not be available via BACnet.

BACnet is a registered trademark of ASHRAE. ASHRAE does not endorse, approve or test products for compliance with ASHRAE standards. Compliance of listed products to the requirements of ASHRAE Standard 135 is the responsibility of BACnet International (BI).
