

Keep Your Control System— And Bid Farewell to Fluorescents Forever!

Challenge: Upgrade your fluorescent lighting to LEDs while maintaining your Lutron control system.

Lutron can help.

- No new wiring to the fixtures, no need to replace your Lutron controls
- Implement the retrofit on your own schedule
 - one fixture at a time using ballast replacement funds
 - one zone at a time for small project implementation
 - as a large group or entire building — use available maintenance funds dollars while meeting time and budget constraints

Benefits of LED Upgrades

- Save energy while improving light output
- No more buying/storing/replacing/disposing of fluorescent lamps
- New warranty on the driver and LEDs
- Supported by Lutron and our OEM partners
