❈LUTRON

Create Your Comfort Zone

with Lutron smart shades

Experience the convenience of closing your shades with the simple touch of a button, from anywhere in a room. Or, imagine being able to schedule you window shades to automatically raise every morning, so you can wake to natural light.

Lutron smart shades allow you to effortlessly create a comfortable environment throughout your home with the app control, a voice assistant, or a simple touch on your smart remote.

Starting at
$599

New, Lower Price Point

Pricing starts at $599 for shades up to 48" x 80".
Shades are available in configurations up to
108" x 120" and can be mounted one of three
ways — inside, outside on the window frame, or
outside above the window frame.

Haven Blackout in White

Curated Fabrics

Get the right look for any room with four fabrics in our
most popular color offering, available in blackout and
translucent options. Or, tap into Lutron's extensive
fabric collection* for even more choices.

*Additional charges may apply.

| Haven Translucent in White | Haven Blackout in White | Haven Translucent in Light Grey | Haven Blackout in Light Grey |

Note: Battery-powered shades will have a light gap on either side of
the fabric and a full blackout application cannot be achieved. For more
effective light blocking, an outside mount is recommended.

Minimalist Design

With the batteries discreetly concealed within the open
roll, the shade offers a low-profile design that blends
seamlessly with any home decór.

Easy to Maintain

Shades are designed to operate without any wires
and are powered by standard D-cell alkaline batteries.
With an average battery life of 2 years, you can enjoy
hassle-free operation without the worry of frequent battery
replacements.

Control Your Way

Lutron smart shades, plus a smart remote and a Lutron smart hub, give you everything you need for flexible, powerful control of your shades and other smart home products.

The Lutron smart hub also works with other leading smart home brands for seamless integration. Expand your system and add even more convenience to your day-to-day routine. Here are just a few examples of what integration can do for you:

· Busy making dinner? Control lights and shades with your voice.

· Setting the mood? Create preset scenes for your shades, lights, and music.
